About

My name is Vlad, I'm full-stack developer focused on frontend with strong attention to design details and responsive, pixel-perfect UI implementation from Figma. I specialize in building modern web interfaces using Vue/Nuxt, TypeScript, and Tailwind CSS. Currently finalizing a custom Bento-style personal micro-site builder and open to part-time or remote web development opportunities.

Projects

Micro-site builder ↗
This is a modern link-in-bio and micro-website builder.

Projects ↗
Pixel-perfect, responsive layouts translated from Figma into clean HTML/SCSS and vanilla JS with Gulp build workflows

Work Experience

Metamorfosi Frontend Developer
Sep 2021 - Mar 2023 | Remote

Built responsive websites from Figma using HTML, SCSS, JS, and Gulp, collaborating with backend developers and continuous site maintenance

Freelance Frontend & Full-Stack Developer
Apr 2023 - Present | Remote

Delivered Figma-to-HTML frontend layouts for a recurring freelance client, also built custom Discord bots

Stacks
